**REMARKS:**

1. "" means this configuration, "0" means optional configuration, and "-" means no such configuration.
2. In order to better meet the needs of customers, equation Leopard continues to develop and improve its products. Some of the configurations and specifications of market models may be different from this configuration table. For details, please refer to the real car. We will try our best to ensure that the information is complete and accurate.
3. On pure electric mileage and comprehensive mileage: in actual road driving, different ambient temperature, driving habits and operation will lead to differences in driving mileage.
4. The approach angle, departure angle and minimum ground clearance of the cloud plate are all values when the suspension is adjusted to the maximum.
